

升級再造

紙包飲品盒、膠樽、廁紙筒、雨遮套... 這些日常物品，除了掉，還可以用來做甚麼？

原來可以用來造散紙包、豬仔錢罌、杯墊及其他你意想不到的東西，快上我們的 facebook 看一看，居家抗疫，都可以一同發揮創意。

飲料如何選？

炎炎夏日，小編在起市或便利店選購飲品時遇到這個煩惱：我應該選購甚麼容器飲品？玻璃樽？鋁罐？膠樽？三種物質都不易被分解，一旦被棄置於堆填區，分分鐘要數百年才能被分解。你會如何選擇？

	味道	環保		
		運送過程	回收率	重用
玻璃樽	最能保持溫度、最	需要空間和燃	低	可重用
鋁罐	傳熱快，最容易冷卻，不透氣	需要空間和燃料較少	較高	較難重用
膠樽	容易漏氣	需要空間和燃	低	可重用

參與測試計劃至本月底結束，謝謝大家參與。請填妥測試後意見調查，然後聯絡吳小姐，我們會回餽小禮物。

回顧 7 月廢物量

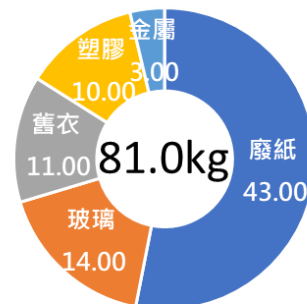

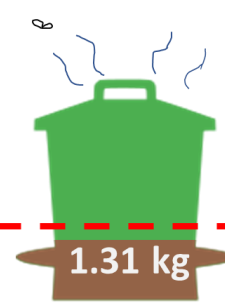

有幾多垃圾？

平均廢物量(每戶每日)

廢物總重量 (kg)

*2018年香港每人每日平均1.53 kg

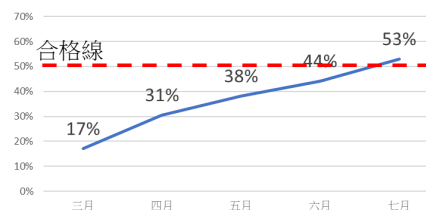

萬發大樓上月共有 2,295 公斤垃圾，而每戶平均每日產生 1.31 公斤垃圾，雖然比上個月升了 6%，但相對仍處於低水平。

在七月份，受季節性因素影響，我們一共收集了 81.0 公斤的回收物，以廢紙最多，當中主要是工作紙及書本。

住戶遵規率方面，過去幾個月持續上升，表現理想，一旦實行廢物徵費，希望各住戶會遵從使用指定袋棄置垃圾。

住戶遵規率

Upcycling

What do you think about beverage boxes, plastic bottles, toilet rolls, umbrella bags? Besides disposal, what can we do for them?

We can make coin pouches, piggy banks, coasters and other surprising items. Visit our facebook page. Let's share the gorgeous ideas about upcycling.

The choice of beverages

Are you confused when buying beverages in the marts or convenience stores? What should we choose to buy in terms of the containers? Glass bottles? Aluminum cans? Plastic bottles? These material can't be biodegradable. Once disposing in the landfills, it takes hundreds years to decompose. What is your choice?

Tasty		Eco-Friendly		
		Transportation	Recycle rate	Reuse
Glass bottles	Keep temperature, Keep the most fizzy	Bulky and use more energy	Low	Reusable
Aluminum Cans	Temperate change quickly, Keep fizzy	Less space and use less energy	Relative high	Not easily reuse
Plastic bottles	Easy to go flat	Less space and use less energy	Low	Reusable

The trial scheme is nearly to the end. Thanks for your participation. Please help us to finish the questionnaire. You may redeem a gift if you contact and return the questionnaire to Ms Ng.

Review in July

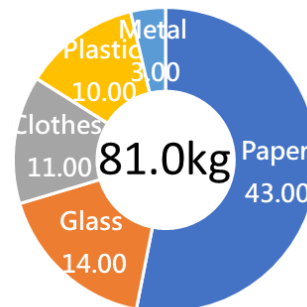

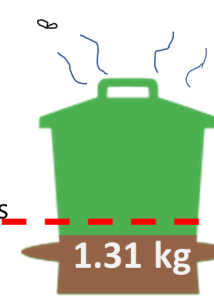

How much rubbish?

*Disposal rate of waste in 2018 is 1.53 kg/person/day.

Disposal rate of waste (kg/person/day)

Total weight of waste (kg)

There was 2,295 kg waste disposal last month. The average weight of waste per household per day was 1.31 kg. Although there is a rise 6% compared to June, it is a relatively low level of household waste.

Due to the seasonal factor, we have collected 81.0 kg recyclables in July, especially paper. Worksheets and old books are the main components.

Regards to the compliance rate of designated bags, we are glad that the increasing trend of the figure in the period. Once the MSW charging implementation, please follow and use the designated bags for disposal.
